12+

years in HSE / SHEQ

03

industrial settings

13

selected credentials

Thanh Hoa, Vietnam

+84 947 067 444

A leadership profile built to own factory risk.

ROLE POSITIONING / HSE HEAD • SHEQ MANAGER

I build the control rhythm that lets production move with discipline: governance, field verification, workforce readiness and decisive corrective action.

PLAN • VERIFY • IMPROVE

CONTROL STATUS / ACTIVE

REFINERY • FOOTWEAR • EDIBLE OIL

12+ years in HSE / SHEQ

Review the four decision signals below, then move directly into the operating mandate, career record and evidence register.

EVIDENCE DISCIPLINE	A	B	C
	VERIFIED PROFESSIONAL EXPERIENCE Career roles, scope and responsibilities drawn from the supplied CV and supporting record.	DIGITAL & AI PROJECTS Founder-built tools, prototypes and workflows presented as product evidence—not historical SHEQ outcomes.	PROJECTED / VALIDATION REQUIRED Implementation targets or candidate-provided metrics are explicitly labelled for responsible review.

Governance that reaches the field

I turn legal, system and leadership requirements into plans, inspections, audit readiness, drills and accountable follow-through.

Leadership across complex risk contexts

My record spans refinery construction, large-workforce footwear manufacturing and edible-oil production in Vietnam.

03

Performance presented for verification

Safety outcomes are linked to role, period and evidence context so a hiring team can assess them with discipline.

04

Digital controls with SHEQ judgment

I apply AI to accelerate legal review, field-risk analysis and follow-through while professional validation remains in control.

RECRUITER READING PATH

01 / OPERATING GOVERNANCE

02 / SAFETY PERFORMANCE RECORD

03 / EXPERIENCE / 2014 — PRESENT

SELECTED ENVIRONMENTS

NSRP

10M t/year design capacity
Refinery & petrochemical context

ANNORA

~30,000-worker environment
Footwear manufacturing for Nike

NORTALIC

Musim Mas Group member
Multinational vegetable-oil & derivatives group

Evidence that safety systems perform

30%

Contributed to a lower occupational accident rate at Annora.

ROLE	HSE Manager
PERIOD	Aug 2017 – Sep 2018
CONTEXT	Annora footwear manufacturing environment
WHAT I DID	HSE procedures, safety communication and machine-risk follow-through
EVIDENCE STATUS	Candidate-provided operating metric · evidence available on request

08 YEARS

Contributed to a sustained accident-free operating record at Nortalic.

ROLE	SHEQ Manager
PERIOD	2018 – present operating record
CONTEXT	NORTALIC vegetable-oil manufacturing operation
WHAT I DID	Integrated SHEQ and fire-control governance
EVIDENCE STATUS	Candidate-provided operating metric · validation context available on request

7M+

Safe working hours without LTA in the applicable operating record.

ROLE	SHEQ leadership contribution
PERIOD	Applicable operating record
CONTEXT	Safe-work-hour operating record without LTA
WHAT I DID	Control routines, training, inspections and follow-through
EVIDENCE STATUS	Candidate-provided operating metric · not independently verified

CANDIDATE-PROVIDED OPERATING METRICS · CONTEXT AND EVIDENCE REGISTER AVAILABLE ON REQUEST

Three industrial worlds. One HSE operating mindset.

01

REFINERY & PETROCHEMICAL

NSRP / Nghi Son Refinery & Petrochemical Project

HSSE Manager · 2014 — 2017

OPERATING CONTEXT

Refinery and petrochemical construction on a major complex with a 10-million-tonne/year design processing capacity as project context.

RISK PROFILE

High-risk construction activity, contractor coordination and complex site-response demands required disciplined HSSE supervision.

MY LEADERSHIP EXPOSURE

I managed site HSSE supervision; coordinated contractor safety and incident response; developed procedures, training plans, safety meetings and weekly management reporting.

CAPABILITY BUILT

Coordinating critical controls, escalation and management information across a complex construction delivery setting.

PROJECT CONTEXT 

02

FOOTWEAR MANUFACTURING

Annora Vietnam Footwear

HSE Manager · 2017 — 2018

OPERATING CONTEXT

Footwear manufacturing for Nike within an approximately 30,000-worker operating environment and a global sportswear supply chain.

RISK PROFILE

Production intensity, machinery risk, fire and explosion prevention, and workforce communication created a distinct HSE control challenge.

MY LEADERSHIP EXPOSURE

As HSE Manager, I directed workplace safety, health and environmental controls; established HSE supervision and weekly reporting; assessed machine risk and followed machine-guarding improvements.

CAPABILITY BUILT

Translating technical controls into visible, repeatable workforce practice in a high-volume production environment.

CANDIDATE-PROVIDED OPERATING CONTEXT 

03

EDIBLE-OIL MANUFACTURING

North Continental Oils & Fats Vietnam (NORTALIC)

SHEQ Manager · 2018 — Present

OPERATING CONTEXT

Vegetable-oil manufacturing within the Musim Mas Group; approximately 300 employees are the confirmed factory workforce context.

RISK PROFILE

Integrated SHEQ, fire prevention and fighting, legal compliance, emergency readiness and audit interfaces needed to work as one governance system.

MY LEADERSHIP EXPOSURE

I lead SHEQ procedures, annual plans, operating standards, legal reviews, fire-system inspections, emergency drills, internal audits and audit readiness.

CAPABILITY BUILT

Integrating field controls, assurance routines and management review into factory-level SHEQ governance.

COMPANY CONTEXT 

TRANSFERABLE HSE LEADERSHIP

Risk identification → Critical controls → Ownership → Field verification → Management assurance → Continuous improvement

MY MANAGEMENT PHILOSOPHY

Different industries create different hazards. The management challenge is consistent: identify what matters most, establish effective controls, make ownership visible, verify execution, and learn from deviations.

I manage a control system.

I do not treat inspection, training, audit or incident response as isolated activities. I connect them into a disciplined operating loop that gives management a clearer basis for risk decisions.

 **EVIDENCE ANCHOR**

· NORTALIC integrated SHEQ governance, Annora machine-risk assessment and safety communication, and refinery contractor coordination / weekly reporting.

HSE CONTROL ARCHITECTURE

From risk signals to management assurance.

GOV Governance Policy, legal register, accountability, standards ANCHOR / NORTALIC	RSK Risk Hazard identification, JHA, machine risk ANCHOR / ANNORA	CTL Critical controls Operating procedures, control questions, follow-through ANCHOR / SHEQ	PPL People Training, communication, leadership, competence ANCHOR / ANNORA
FLD Field execution Inspection, observation, emergency readiness ANCHOR / NORTALIC	PRF Performance KPI, incidents, audit findings, actions ANCHOR / EVIDENCE	ASR Assurance Audit, compliance verification, evidence ANCHOR / NORTALIC	IMP Improvement CAPA thinking, lessons learned, Kaizen ANCHOR / SYSTEM

ILLUSTRATIVE MANAGEMENT THINKING MODEL

Risk priority

Severity × Exposure × Likelihood × Control Effectiveness

→ **priority** → **owner** → **verification frequency** → **escalation**

Illustrative management thinking model – adapted to site methodology.

MANAGEMENT CADENCE

Daily Field observations · critical controls · urgent actions	Weekly Safety performance · open actions · contractor and operational risks
Monthly KPI · incident trends · audit findings · compliance actions	Quarterly Systemic risks · capability · resources · improvement priorities
Annual HSE plan · objectives · emergency readiness · management review	

Evidence anchor: plans, inspections, drills, audit and reporting routines across the professional record.

IF I JOIN YOUR FACTORY

A controlled start. Not a generic promise.

0—30

Understand

Business, processes, legal picture, risk profile, people, contractors and emergency readiness.

31–60

Control

Prioritize critical risks, clarify ownership, strengthen controls and close material compliance gaps.

61–90

Improve

Establish KPI review, capability development, corrective-action effectiveness and digital opportunities.

 **ILLUSTRATIVE LEADERSHIP APPROACH** · Adapted to site conditions; informed by experience with annual plans, risk review, audit readiness, emergency drills and management reporting.

HOW I CONTROL EXECUTION

A manager's role is to **make controls work.**

CONTRACTOR CONTROL PATH

01	Pre-qualification	02	Induction	03	Risk review
04	Supervision	05	Field verification	06	Corrective action & close-out

WHEN SOMETHING GOES WRONG

01	Immediate control	02	Protect people	03	Stabilize operation
04	Notify / escalate	05	Fact finding	06	Corrective action
07	Verify effectiveness	08	Lesson learned		

WHAT I WOULD LOOK AT FIRST

01	What can kill or seriously injure someone?	02	Which critical controls prevent those events?	03	Who owns those controls?	04	How do we know they are working?	05	Where are recurring deviations?
06	What does incident data tell us?	07	What does the legal picture look like?	08	Are contractors controlled to the same standard?	09	Can the organization respond to a major emergency?	10	Does management have reliable information?

 **EVIDENCE ANCHOR** · Refinery contractor coordination and site-response discipline; NORTALIC fire-system inspection and emergency drills; Annora workforce safety communication.

10

CORE
CAPABILITIES

CAPABILITY MAP

**From systems
to site action.**

01

Integrated management systems

Build and sustain ISO 9001, ISO 14001, ISO 22000 and OHSAS 18001-aligned practices with clear ownership, reviews and records.

INSPECT / CTRL-01

02

Risk & control engineering

Apply JHA, machine risk assessment, P&ID comprehension, field inspection and corrective-action discipline to critical controls.

INSPECT / CTRL-02

03

Fire & emergency readiness

Design training and drill routines; inspect firefighting facilities; develop practical escalation paths before incidents occur.

INSPECT / CTRL-03

04

Workforce capability

Translate technical and legal requirements into training, meetings and site-level routines that people can consistently execute.

INSPECT / CTRL-04

05

Audit & compliance leadership

Prepare teams for internal, customer and corporate audits; support reporting, review and engagement with relevant authorities.

INSPECT / CTRL-05

06

Continuous improvement

Use Lean manufacturing tools, 5S, KPI thinking, Kaizen and the 7 wastes to connect safety performance with daily operations.

INSPECT / CTRL-06

AI engineered for safer, faster SHEQ action.

I actively design and apply AI-enabled workflows wherever they can create practical value for SHEQ operations: turning legal updates into actions, turning field observations into risk conversations, and turning fragmented records into management-ready controls. The objective is not technology for its own sake; it is more time for prevention, clearer accountability and faster follow-through.

01 CONTROL SYSTEMS One operating view Connect incident, inspection, audit and action ownership in one SHEQ rhythm.	02 LEGAL TO ACTION Change made accountable Translate legal updates into impact questions, owners, deadlines and control actions.	03 FIELD INTELLIGENCE Faster, verified decisions Use AI to focus hazard review and management insight; professional judgment remains decisive.
