SHEQ MANAGER • HSE LEADER • INDUSTRIAL SAFETY PROFESSIONAL

Safety leadership built for complex operations.

Nguyen Ba Thang brings more than a decade of HSE, HSSE and SHEQ leadership across refinery construction, footwear manufacturing and edible-oil operations in Vietnam.

Turning compliance into controls that work on the factory floor.

Thang is an HSE/SHEQ leader with practical expertise in building safety, health, environmental, quality and fire-prevention systems that stand up to real operating pressure. His work combines legal awareness, risk evaluation, management systems, workforce communication and disciplined follow-through.

He is experienced in advising factory leadership, coordinating with contractors and authorities, preparing teams for audit, and translating technical requirements into clear site routines. He works confidently in Vietnamese and English, including technical and commercial documentation.

CANDIDATE-PROVIDED OPERATING ACHIEVEMENT METRICS

Three operating environments. One safety standard.

CP-01

2018 — Present

SHEQ MANAGER

North Continental Oils & Fats Vietnam (NORTALIC)

Edible-oil manufacturing
· Musim Mas Group

01

Leads integrated Safety, Health, Environment, Quality and Fire Prevention & Fighting governance within a vegetable-oil manufacturing operation.

- ✓ Establishes and maintains SHEQ procedures, annual plans, operating standards and site controls.
- ✓ Leads legal-compliance reviews, fire-system inspections, emergency drills, internal audits and customer/corporate audit readiness.
- ✓ Advises factory leadership on risk, incident response, training priorities, budget planning and regulatory engagement.

COMPANY CONTEXT 

CP-02

2017 — 2018

HSE SUPERVISOR

Annora Vietnam Footwear

Footwear manufacturing for Nike · ~30,000-
worker operating environment

02

Strengthened HSE execution in a fast-moving, high-workforce footwear manufacturing environment serving a global sportswear supply chain.

- ✓ Supervised workplace safety, fire and explosion prevention, health protection and environmental controls.
- ✓ Built HSE supervision procedures, weekly reporting routines and employee safety communication plans.

CP-03

2014 — 2017

HSSE MANAGER

LILAMA LISEMC0 · Nghi Son Refinery & Petrochemical Project

Construction delivery ·
major refinery &
petrochemical complex

03

Managed HSSE supervision within a complex construction setting, coordinating contractor safety activities and site response disciplines.

- ✓ Supervised HSSE activities across the construction site and coordinated with contractors on incident-response solutions.
- ✓ Developed HSSE supervision procedures, training plans, safety meetings and weekly management reporting.
- ✓ Contributed safety leadership in a refinery complex with a 10-million-tonne annual design processing capacity.

PROJECT CONTEXT 

From systems to site action.

01

Integrated management systems

Build and sustain ISO 9001, ISO 14001, ISO 22000 and OHSAS 18001-aligned practices with clear ownership, reviews and records.

INSPECT / CTRL-01

02

Risk & control engineering

Apply JHA, machine risk assessment, P&ID comprehension, field inspection and corrective-action discipline to critical controls.

INSPECT / CTRL-02

03

Fire & emergency readiness

Design training and drill routines; inspect firefighting facilities; develop practical escalation paths before incidents occur.

INSPECT / CTRL-03

04

Workforce capability

Translate technical and legal requirements into training, meetings and site-level routines that people can consistently execute.

INSPECT / CTRL-04

05

Audit & compliance leadership

Prepare teams for internal, customer and corporate audits; support reporting, review and engagement with relevant authorities.

INSPECT / CTRL-05

06

Continuous improvement

Use Lean manufacturing tools, 5S, KPI thinking, Kaizen and the 7 wastes to connect safety performance with daily operations.

INSPECT / CTRL-06

AI engineered for safer, faster SHEQ action.

I actively design and apply AI-enabled workflows wherever they can create practical value for SHEQ operations: turning legal updates into actions, turning field observations into risk conversations, and turning fragmented records into management-ready controls. The objective is not technology for its own sake; it is more time for prevention, clearer accountability and faster follow-through.

AI accelerates the work • SHEQ professional judgment owns the decision

AI-01

SYSTEM BUILD

SHEQ Management Software

I develop and configure SHEQ management workflows that connect inspections, incidents, actions, audits, permits, evidence and management reporting in one operating system.

AI-02

REGULATORY INTELLIGENCE

Legal Change → Action Map

I use AI to monitor, structure and compare relevant legal or standard updates, then convert potential impacts into owner-ready review tasks, compliance questions and control updates.

AI-04

RISK ENGINEERING

JHA & Risk Analysis Co-pilot

I use AI to structure

workforces.

CONTROL PHILOSOPHY / 06

“Safety leadership is measured in preparedness, clarity, and consistent execution.”

Every system should be easy to understand, practical to operate and strong enough to protect people when conditions change.
