# A leadership profile built to own factory risk.

ROLE POSITIONING / HSE HEAD • SHEQ MANAGER

I build the control rhythm that lets production move with discipline: governance, field verification, workforce readiness and decisive corrective action.

PLAN • VERIFY • IMPROVE

CONTROL STATUS / ACTIVE

REFINERY • FOOTWEAR • EDIBLE  
OIL

12+

years in HSE / SHEQ

Review the four decision signals below, then move directly into the operating mandate, career record and evidence register.

01

## Governance that reaches the field

I turn legal, system and leadership requirements into plans, inspections, audit readiness, drills and accountable follow-through.

02

## Leadership across complex risk contexts

My record spans refinery construction, large-workforce footwear manufacturing and edible-oil production in Vietnam.

03

04

## Performance presented for verification

Safety outcomes are linked to role, period and evidence context so a hiring team can assess them with discipline.

## Digital controls with SHEQ judgment

I apply AI to accelerate legal review, field-risk analysis and follow-through while professional validation remains in control.

03 / EXPERIENCE / 2014 — PRESENT

01

### EXECUTIVE PROFILE

### THE PROFESSIONAL MANDATE

# Turning compliance into controls that work on the factory floor.

I am an HSE/SHEQ leader with practical expertise in building safety, health, environmental, quality and fire-prevention systems that stand up to real operating pressure. My work combines legal awareness, risk evaluation, management systems, workforce communication and disciplined follow-through.

I advise factory leadership, coordinate with contractors and authorities, prepare teams for audit, and translate technical requirements into clear site routines. I work confidently in Vietnamese and English, including technical and commercial documentation.

CANDIDATE-PROVIDED OPERATING METRICS • CONTEXT AND EVIDENCE REGISTER AVAILABLE ON REQUEST

# Three operating environments. One safety standard.

CP-01

2018 — Present

SHEQ MANAGER

## North Continental Oils & Fats Vietnam (NORTALIC)

Edible-oil  
manufacturing · Musim  
Mas Group

01

Leads integrated Safety, Health, Environment, Quality and Fire Prevention & Fighting governance within a vegetable-oil manufacturing operation.

- ✓ Establishes and maintains SHEQ procedures, annual plans, operating standards and site controls.
- ✓ Leads legal-compliance reviews, fire-system inspections, emergency drills, internal audits and customer/corporate audit readiness.
- ✓ Advises factory leadership on risk, incident response, training priorities, budget planning and regulatory engagement.

COMPANY CONTEXT [↗](#)

CP-02

2017 — 2018

HSE MANAGER

## Annora Vietnam Footwear

Footwear manufacturing for Nike ·  
~30,000-worker operating  
environment

02

Strengthened HSE execution in a fast-moving, high-workforce footwear manufacturing environment serving a global sportswear supply chain.

- ✓ Supervised workplace safety, fire and explosion prevention, health protection and environmental controls.
- ✓ Built HSE supervision procedures, weekly reporting routines and employee safety communication plans.

- ✓ Conducted machine risk assessments and followed through on machine-guarding improvements.

CANDIDATE-PROVIDED OPERATING CONTEXT [↗](#)

CP-03

2014 — 2017

HSSE MANAGER

## LILAMA CORP • Nghi Son Refinery & Petrochemical Project

Construction delivery •  
major refinery &  
petrochemical complex

03

Managed HSSE supervision within a complex construction setting, coordinating contractor safety activities and site response disciplines.

- ✓ Supervised HSSE activities across the construction site and coordinated with contractors on incident-response solutions.
- ✓ Developed HSSE supervision procedures, training plans, safety meetings and weekly management reporting.
- ✓ Contributed safety leadership in a refinery complex with a 10-million-tonne annual design processing capacity.

PROJECT CONTEXT [↗](#)

05

CORE  
CAPABILITIES

CAPABILITY MAP

# From systems to site action.

01

## Integrated management systems

Build and sustain ISO 9001, ISO 14001, ISO 22000 and OHSAS 18001-aligned practices with clear ownership, reviews and records.

INSPECT / CTRL-01

02

## Risk & control engineering

Apply JHA, machine risk assessment, P&ID comprehension, field inspection and corrective-action discipline to critical controls.

INSPECT / CTRL-02

03

## Fire & emergency readiness

Design training and drill routines; inspect firefighting facilities; develop practical escalation paths before incidents occur.

INSPECT / CTRL-03

04

## Workforce capability

Translate technical and legal requirements into training, meetings and site-level routines that people can consistently execute.

INSPECT / CTRL-04

05

## Audit & compliance leadership

Prepare teams for internal, customer and corporate audits; support reporting, review and engagement with relevant authorities.

INSPECT / CTRL-05

06

## Continuous improvement

Use Lean manufacturing tools, 5S, KPI thinking, Kaizen and the 7 wastes to connect safety performance with daily operations.

INSPECT / CTRL-06

# AI engineered for safer, faster SHEQ action.

I actively design and apply AI-enabled workflows wherever they can create practical value for SHEQ operations: turning legal updates into actions, turning field observations into risk conversations, and turning fragmented records into management-ready controls. The objective is not technology for its own sake; it is more time for prevention, clearer accountability and faster follow-through.

01

## CONTROL SYSTEMS

### One operating view

Connect incident, inspection, audit and action ownership in one SHEQ rhythm.

02

## LEGAL TO ACTION

### Change made accountable

Translate legal updates into impact questions, owners, deadlines and control actions.

03

## FIELD INTELLIGENCE

### Faster, verified decisions

Use AI to focus hazard review and management insight; professional judgment remains decisive.

## LIVE FOUNDER EVIDENCE
