DOC / NBT-SHEQ-01

CONTROL STATUS / ACTIVE

LOCATION / VN-TH

EVIDENCE FRAME / 01

INDUSTRIAL
OPERATIONS

OPERATING PROFILE / 01

SHEQ MANAGER · HSE LEADER · INDUSTRIAL SAFETY PROFESSIONAL

Safety leadership built for complex operations.

I bring more than a decade of HSE, HSSE and SHEQ leadership across refinery construction, footwear manufacturing and edible-oil operations in Vietnam.

REVIEW LEADERSHIP EVIDENCE

10+

years in HSE / SHEQ

03

industrial settings

13

selected credentials

Thanh Hoa, Vietnam

+84 947 067 444

A leadership profile built to own factory risk.

ROLE POSITIONING / HSE HEAD • SHEQ MANAGER

I build the control rhythm that lets production move with discipline: governance, field verification, workforce readiness and decisive corrective action.

PLAN • VERIFY • IMPROVE

CONTROL STATUS / ACTIVE

REFINERY • FOOTWEAR • EDIBLE
OIL

10+

years in HSE / SHEQ

Review the four decision signals below, then move directly into the operating mandate, career record and evidence register.

01

Governance that reaches the field

I turn legal, system and leadership requirements into plans, inspections, audit readiness, drills and accountable follow-through.

02

Leadership across complex risk contexts

My record spans refinery construction, large-workforce footwear manufacturing and edible-oil production in Vietnam.

03

04

Performance presented for verification

Safety outcomes are linked to role, period and evidence context so a hiring team can assess them with discipline.

Digital controls with SHEQ judgment

I apply AI to accelerate legal review, field-risk analysis and follow-through while professional validation remains in control.

RECRUITER READING PATH

01 / OPERATING GOVERNANCE

02 / SAFETY PERFORMANCE RECORD

03 / EXPERIENCE / 2014 — PRESENT

01

EXECUTIVE PROFILE

THE PROFESSIONAL MANDATE

Turning compliance into controls that work on the factory floor.

I am an HSE/SHEQ leader with practical expertise in building safety, health, environmental, quality and fire-prevention systems that stand up to real operating pressure. My work combines legal awareness, risk evaluation, management systems, workforce communication and disciplined follow-through.

I advise factory leadership, coordinate with contractors and authorities, prepare teams for audit, and translate technical requirements into clear site routines. I work confidently in Vietnamese and English, including technical and commercial documentation.

02 LEADERSHIP
MANDATE

OPERATING GOVERNANCE

Turning SHEQ responsibility into
a management cadence.

LM-01

REPORTING LINE

Factory Manager

Direct advisory on SHEQ performance, incidents, compliance priorities
and corrective actions.

LM-02

GOVERNANCE SCOPE

SHEQ + Fire Prevention

Plans, procedures, operating standards, inspections, emergency
preparedness and legal compliance.

LM-03

OPERATING INTERFACES

Leaders • Contractors • Authorities

Aligning operational decisions, contractor controls, statutory engagement and audit readiness.

LM-04

CONTROL CADENCE

Plan • Audit • Drill • Review

Annual planning, workforce capability, internal audit, emergency drill and management review routines.

Scope shown from the candidate's professional record; quantitative team and budget data can be added once confirmed.

Evidence that safety systems perform.

30% Contributed to a lower occupational accident rate at Annora. ROLE HSE Supervisor PERIOD Aug 2017 — Sep 2018 EVIDENCE Candidate-provided operating metric	08 YEARS Contributed to a sustained accident-free operating record at Nortalic. ROLE SHEQ Manager PERIOD 2018 — present operating record EVIDENCE Candidate-provided operating metric	7M+ Safe working hours without LTA in the applicable operating record. CANDIDATE-PROVIDED OPERATING METRICS • CONTEXT AND EVIDENCE REGISTER AVAILABLE ON REQUEST

Three operating environments. One safety standard.

CP-01

2018 — Present

SHEQ MANAGER

North Continental Oils & Fats Vietnam (NORTALIC)

Edible-oil
manufacturing · Musim
Mas Group

01

Leads integrated Safety, Health, Environment, Quality and Fire Prevention & Fighting governance within a vegetable-oil manufacturing operation.

- ✓ Establishes and maintains SHEQ procedures, annual plans, operating standards and site controls.
- ✓ Leads legal-compliance reviews, fire-system inspections, emergency drills, internal audits and customer/corporate audit readiness.
- ✓ Advises factory leadership on risk, incident response, training priorities, budget planning and regulatory engagement.

COMPANY CONTEXT [↗](#)

CP-02

2017 — 2018

HSE SUPERVISOR

Annora Vietnam Footwear

Footwear manufacturing for Nike ·
~30,000-worker operating
environment

02

Strengthened HSE execution in a fast-moving, high-workforce footwear manufacturing environment serving a global sportswear supply chain.

- ✓ Supervised workplace safety, fire and explosion prevention, health protection and environmental controls.
- ✓ Built HSE supervision procedures, weekly reporting routines and employee safety communication plans.

- ✓ Conducted machine risk assessments and followed through on machine-guarding improvements.

CANDIDATE-PROVIDED OPERATING CONTEXT [↗](#)

CP-03

2014 — 2017

HSSE MANAGER

LILAMA LISEMCO • Nghi Son Refinery & Petrochemical Project

Construction delivery · major refinery & petrochemical complex

03

Managed HSSE supervision within a complex construction setting, coordinating contractor safety activities and site response disciplines.

- ✓ Supervised HSSE activities across the construction site and coordinated with contractors on incident-response solutions.
- ✓ Developed HSSE supervision procedures, training plans, safety meetings and weekly management reporting.
- ✓ Contributed safety leadership in a refinery complex with a 10-million-tonne annual design processing capacity.

PROJECT CONTEXT [↗](#)

From systems to site action.

01

Integrated management systems

Build and sustain ISO 9001, ISO 14001, ISO 22000 and OHSAS 18001-aligned practices with clear ownership, reviews and records.

INSPECT / CTRL-01

02

Risk & control engineering

Apply JHA, machine risk assessment, P&ID comprehension, field inspection and corrective-action discipline to critical controls.

INSPECT / CTRL-02

03

Fire & emergency readiness

Design training and drill routines; inspect firefighting facilities; develop practical escalation paths before incidents occur.

INSPECT / CTRL-03

04

Workforce capability

Translate technical and legal requirements into training, meetings and site-level routines that people can consistently execute.

INSPECT / CTRL-04

05

Audit & compliance leadership

Prepare teams for internal, customer and corporate audits; support reporting, review and engagement with relevant authorities.

INSPECT / CTRL-05

06

Continuous improvement

Use Lean manufacturing tools, 5S, KPI thinking, Kaizen and the 7 wastes to connect safety performance with daily operations.

INSPECT / CTRL-06

AI engineered for safer, faster SHEQ action.

I actively design and apply AI-enabled workflows wherever they can create practical value for SHEQ operations: turning legal updates into actions, turning field observations into risk conversations, and turning fragmented records into management-ready controls. The objective is not technology for its own sake; it is more time for prevention, clearer accountability and faster follow-through.

🕒 AI accelerates the work • SHEQ professional judgment owns the decision

AI-01

SYSTEM BUILD

SHEQ Management Software

I develop and configure SHEQ management workflows that connect inspections, incidents, actions, audits, permits, evidence and management reporting in one operating system.

EST. IMPACT

~35% less manual coordination time

AI-02

REGULATORY INTELLIGENCE

Legal Change → Action Map

I use AI to monitor, structure and compare relevant legal or standard updates, then convert potential impacts into owner-ready review tasks, compliance questions and control updates.

EST. IMPACT

24/Q updates screened per quarter

AI-03

VISION-ASSISTED FIELD SAFETY

Hazard Recognition Support

I apply AI-assisted visual review to help surface potential hazards in field images and observations, enabling faster SHEQ discussion and targeted professional verification.

EST. IMPACT

2× faster preliminary hazard triage

AI-04

RISK ENGINEERING

JHA & Risk Analysis Co-pilot

I use AI to structure hazard registers, prompt control questions, compare scenarios and accelerate risk-analysis drafts—always finalized through site knowledge and SHEQ approval.

EST. IMPACT

~40% faster first-draft risk analysis

AI-05

WORKFORCE ENABLEMENT

Bilingual Training & Communication

I create role-relevant SOP drafts, toolbox materials, micro-learning scenarios and knowledge checks that make technical controls clearer for diverse workforces.

EST. IMPACT

3x faster training-content drafting

AI-06

MANAGEMENT INSIGHT

Signals, Trends & Follow-through

I turn recurring non-confidential SHEQ data, observations and reports into emerging-risk themes, concise management summaries and practical follow-up actions.

EST. IMPACT

~60% less time to prepare trend summaries

🔔 Projected operating targets are indicative estimates for implementation planning — not historic performance claims. Validate with site data after deployment.

AI projects built for operational proof.

These project frames are ready for screenshots, workflow diagrams, anonymised reports or before-and-after evidence as each implementation is documented.

CS-01

SHEQ Operations Control Room

A configurable software layer that brings routine SHEQ controls, actions and evidence into one visible operating rhythm.

OPERATING INPUT

Inspections, permits, incidents, audits and action owners

SHEQ OUTPUT

Traceable controls, action status and management-ready visibility

 **EVIDENCE
STATUS:**

Evidence packaging in progress • screenshot / workflow / outcome record

CS-02

Regulatory Intelligence Engine

An AI-assisted review flow that converts legal and standards updates into a structured compliance action map.

OPERATING INPUT

Legal updates, technical standards and internal procedures

SHEQ OUTPUT

Impact questions, owners, review tasks and control updates

 **EVIDENCE
STATUS:**

Evidence packaging in progress • screenshot / workflow / outcome record

CS-03

CS-03

Hazard Signal Review

A visual-assistance case study for turning field observations into focused hazard conversations and professional validation.

OPERATING INPUT

Field photos, observations, work activity context and risk cues

SHEQ OUTPUT

Potential hazard prompts, control questions and follow-up actions

✓ **EVIDENCE
STATUS:**

Evidence packaging in progress • screenshot / workflow / outcome
record

— CONTROL PHILOSOPHY / 08

“Safety leadership is measured in preparedness, clarity, and consistent execution.”

Every system should be easy to understand, practical to operate and strong enough to protect people when conditions change.

LEADERSHIP MODEL
